

## Brutalist Table Lamp

### Reference:

MPD-003660

#### Description

Absolutely stunning mid century Brutalist table lamp. Body is comprised of a solid block of rough hewn wood. A second block artfully balances within the larger block. Look to the shoulders of the lamp to see a bouquet of ridges that mimic a coral shape. Nestled within the coral ring is a beautiful resin inlay design with an ethereal yellow / red glow. A richly textured golden neck reaches up toward the masterpiece of a lamp shade. The crown of the lamp, this shade is a well worked melange patinated metals. Halved cylinders protrude from three of the four sides of the shade. The back side of the shade is flat. Dots of golden metal adorn the cylinders along with "x" and "o" shaped punctures. An marvel of design certain to be a jewel in your collection.
