Art Deco Double Sconce Streamline Design

Reference:

MPD-001373
Description
What a nice Double Art Deco Streamline Sconce! Note how the lines on the shade match the lines on the fitter and finial and backplate. A complete statement. Heavily CAST backplate instead of sheet metal, this light fixture has a quality construction built into it from the beginning. Note the ON-OFF switch knob at the bottom of the sconce. Instead of just standard, as it comes, we used a rare shape only made during the Deco era. This fixture uses 2 1/4” fitter size glass shades. Sold without shades to allow you to use Art Deco shades of your choice, even antiques. We are showing it here with our amber art deco shades, which are unique shades on the market. The socket can handle up to a 100 watt incandescent bulb, or purchase our optional LED Art Deco looking bulb 60-WW-E26, using only 7 watts and putting out about 75 watts of incandescent equivalent light. Makes running the sconce all night long, perhaps as a nite lite, very economical indeed and cool to the shade as well. The backplate is 6 3/4” wide by 5 1/4” tall. This sconce projects from the wall about 6” depending on which shade you will use. It has a spread of about 11” depending on which shades you use. Overall height from the top of the backplate to the bottom of the shade is 8 3/4” when using our 0319G as shown.
