Art Deco Streamline Modern Wall Sconce

Reference:

MPD-001375
Description
What a nice Art Deco Streamline sconce. Heavily CAST instead of sheet metal, this light has a quality construction built into it from the beginning. Note the On/Off switch knob at the bottom of the sconce. Instead of just standard, as it comes, we use a rare shape only made during the Deco era.

This fixture is only supplied Polished Nickel.

Sold without a shade to allow you to use an Art Deco 2 1/4” fitter shade of your choice, we are showing it here with our 0319G , which is a unique shade on the market that only we make. We also have this shade in amber, which makes a nice ambiance statement, too.

The socket can handle up to a 100 watt incandescent bulb, or purchase our optional LED Art Deco looking bulb 60-WW-E26, using only 7 watts and putting out about 75 watts of incandescent equivalent light. Makes running the sconce all night long, perhaps as a nite lite, very economical indeed and cool to the shade as well.

Measurements: The backplate is 6 3/4” tall by 5 1/4” wide. This sconce projects from the wall about 6 5/8” depending on which shade you will use. Overall height from the top of the backplate to the bottom of the shade is 8 3/4” when using our art deco shade as pictured.
