Art Deco Streamline Modern Wall Sconce

Reference:

MPD-001376
Description
What a nice Art Deco Streamline sconce! Heavily CAST backplate instead of sheet metal, this light has a quality construction built into it from the beginning. Note the On/Off switch knob at the bottom of the sconce. Instead of just standard, as it comes, we use a rare shape only made during the Deco era. Note how the lines on the shade match the lines on the fitter, finial, and backplate. A complete statement. Only supplied in a Nickel Plated finish.

Sold without a shade to allow you to use a 1 3/4” slip-in Art Deco shade of your choice, including original antique shades you may own. We are showing it here with our Streamline Shade, 0350G.

The socket can handle up to a 100 watt incandescent bulb, or purchase our optional LED Art Deco looking bulb 60□-WW-□E26, using only 7 watts and putting out about 75 watts of incandescent equivalent light. Makes running the sconce all night long, perhaps as a nite lite, very economical indeed and cool to the shade as well.

Measurements: The backplate is 6 3/4” tall by 5 1/4” wide. This sconce projects from the wall about 7 1/4”, depending on which shade you will use. Overall height from the top of the backplate to the bottom of the finial is 6 7/8” when using our streamline modern glass shade pictured.
