

## Red Lacquer American Art Deco Side Table Pair

### Reference:

MPD-001972

#### Description

A striking combination of red lacquer and bright copper. This pair of American art deco demilune side tables were a product of The American Specialty Corporation of Indianapolis, Indiana in the 1930's; one of the tables is so marked. A new finish of red lacquer has been professionally applied and the copper polished, then clear lacquered so fingerprints and weather will not disturb the beauty of the tables. The tables are very well made... even the screws are made of solid copper. Each table is 23" high, 24" wide, and 12" deep.
