

American Art Deco Illuminated Mirror

Reference:

MPD-001282

Description

This fantastic American art deco illuminated mirror was purchased by the original owner in 1933. While the original owner had it over a small desk it could also work in a bathroom. The mirror surface is attached to the black back board by four chrome balls. On Each side are placed 10 ½" light fixtures with milk glass tubes, each with reticulated chrome caps top and bottom. The tops have a distinctive finial, the bottom caps have the light switch. Overall, the mirror is 30" tall and 18" wide (20" wide to the outer edge of the tubes).
